Range Service Manual 2010

INTRODUCTION

The 2010 edition of the Atwood Range Service Manual is a resource created to help service technicians identify Atwood product by serial number, diagnose service problems and efficiently and effectively process warranty claims.

Each of the manuals within this series offers a general overview of the product as well as more specific product information. For the range product within this manual, you will find model identification, sequence of operation, part identification and troubleshooting guides, warranty procedures, flat rate schedules, and replacement part reference charts.

Due to the rapidly changing personal computer revolution, we have placed troubleshooting information in a variety of places to make sure that the most accurate information is available. The best place to find the current information about Atwood products is our website: www.atwoodmobile.com. At our website brochures may be downloaded, trouble shooting guides reviewed and the latest information bulletins can be read. In addition, all Atwood Authorized Service Centers are listed on our site, accessible via an easy-to-use search system.

Service for all Atwood products is handled our of our Elkhart Indiana location. Should you have any questions regarding our products or the information contained in this manual simply dial our **Toll Free # 1-800-546-8759** and select option 5 or call **Service** direct at, toll free, **1-866-869-3118**. **Be sure to have the Model and Serial Numbers when you call**.

Cooking Appliance Terminology

Terminology	Definition	Terminology	Definition
ANSI	American National Standard for Recreation Vehicle Cooking Gas	Piezo Igniter	An electro-mechanical device that can be used to ignite a top burner.
Burner Electrode	Appliances The spark source to light top burners with piezo/12 VDC	Pilot Orifice	A precision drilled thimble shaped component that meters gas flow to the pilot.
	electronic ignition. Replaceable for 33 range series.	Regulator	Device that reduces the high pressure from the LP bottles to a
Calibration	The condition that determines		lower pressure for the appliances.
	whether the thermostat is registering temperatures properly.	Sealed Burner	A burner head attached directly to the porcelain main top which
CSA	Certification Agency (Canadian Standards Association)		prevents spilling to the burner box.
	(Cumunan Sumuras Absociation)	Standby Pilot	The oven pilot that burns constantly
Electronic Ignition	12v DC module activated by switch to ignite top burners.		and provides the base for the heater pilot.
Main Burner Orifice	A precision drilled thimble shaped component that meters gas flow to the main burner.	Thermal Bulb	The bulb located in the oven and connected to the thermostat that contains thermal fluid and causes
Manifold	The constantly pressurized tube or pipe that supplies gas to the burner valves.		the thermostat to close and open based on the set cooking temperature.
Oven Thermostat	It is the component that regulates the temperature of the oven at the desired cooking temperature and	Thermocouple	Senses pilot flame for the oven and controls safety valve and thermostat.
	supplies gas for both the standby and heater pilots.	Yellow Tipping	A burner flame with excessive yellow tipping can be caused by improper gas/air mixture. Caused by improper alignment or

restriction of orifice and venturi

tube.

Safety Pilot Valve

. The top burner components mounted on a silver square manifold.

- Ranges in the serial number sequence WT30000 through W840000 used either this system or the Harper Wyman System.
- On a Robertshaw system the following exists: a. the face of the oven control says R.C.C.
- (Robertshaw Control Company) b. the lowest temperature on oven knob is 170°
- c, the face plate of oven control and burner valves have silver torx head screws.
- . The top burner components mounted on a silver square manifold.
- Ranges in the serial number
- sequence WT30000 through
- W840000 used either this system or the Robertshaw System.
- On a Harper Wyman the following pertains:
 - a, the face of the oven control says H.W. (Harper Wyman)
- b, the lowest temperature on oven knob is 1409
- o, the face plate screws on the burner and oven valves are black and have octagonal heads.
- · Products whose model number is Fi or C 7- have combined system (R2137-A).
- + Top burner system is Harper Wyman
- Lowest temperature on oven knob is 170°
- · Oven control system is Robertshaw
- · Ranges whose model number is R ____ 8- 32 have a complete Harper Wyman range valve system.
- Cooktops whose model number is 8-32 to current model have a C complete Harper Wyman valve system
- Top burners are Harper Wyman and linear.
- Lowest temperature on oven knob is 170°
- Oven control and safety pilot valve are also Harper Wyman.
- Ranges whose model number is 3 have a Copreci oven thermostat with Mueller burner valves for the stove top.
- Lowest temperature on oven knob is 300°
- Slide-ins whose model number is C 3 have Mueller burner valves.
- Pilot assembly is White Rodgers

Copreci Oven Thermostat

Pilot Assembly

Burner Systems International

Mercury Free

Burner Valve

Pilot Assembly

- **Ranges with model numbers** R 34
- Lowest Temp on oven knob is 300°F.
- Burner valve also used in slide-in(s) with model number C_34 and C_20

Oven Thermostat

Seven Universe

- **Ranges with model numbers** R___35 and R___21.
- Lowest temp on oven knob is 300°F.
- Burner valve also used in slide-in(s) with model number C_35 and C_21.

Oven Thermostat

Burner Valve

Pilot Assembly

Gas Regulator—Used in all Atwood Ranges, slide-ins and drop-ins. **Seven Universe**

Regulates gas pressure to nominal 10" W.C.

Replaces all previous brands including Harper Wyman, Maxitrol, Oara, and BSI.

Sequence of Operation - Prior to Model 33

Standard Pressure Regulator - this valve receives up to 13" W.C. pressure gas from LP bottles, and

τ

reduces it to 10° W.C. for the manifold.

Manifold - a continually pressurized pipe distributing gas to top burner valves and oven valve.

Ť

Oven Thermostat - supplies gas to the oven pilot, the safety pilot valve, and regulates the oven temperature.

PILOT ASSEMBLY

- Standby Pilot with the oven knob placed in the pilot position, the oven valve will supply gas to the pilot assembly. This standby pilot will stay lit until the oven knob is turned to the OFF position. It also supplies the gas for the heater pilot.
- Heater Pilot on initial start-up, when the oven thermostat knob is turned to the desired temperature, the volume of gas increases from the thermostat and the smaller standby pilot increases to a larger heater pilot flame. This higher pilot flame heats the thermocouple thereby opening the safety pilot valve to allow gas to flow to the oven burner. The heater pilot thereafter only comes on when the thermostat calls for heat.

Component Identification

Safety Pilot Valve - controls the gas flow to the oven burner. The valve is operated by a thermal bulb located over the heater pilot. When this bulb is heated, it opens the safety pilot valve which then supplies gas to the oven burner.

1

Oven Thermostat - senses oven temperature by means of a thermal bulb located in the top of the oven. The oven control knob is set to the desired temperature calling for heat, the fluid expands in this bulb, opens a seat in the thermostat and supplies gas to the safety pilot for the higher heater pilot. This heater pilot initiates the process for starting the oven burner as described above. When the oven temperature is satisfied, the fluid in this bulb decreases which closes a seat in the oven valve and throttles the pilot size down to the standby pilot mode thereby shutting the oven burner OFF. This cycle will continue until the range is turned off.

- The temperature tolerance of the thermostat is ± 25°F.
- The oven burner will come on approximately 1-1/2 minutes from a cold start and 10 seconds from a hot start.
- The oven burner may cycle during the broil mode.

Sequence of Operation—Models 33, 34 and 35

Standard Pressure Regulator— This valve receives up to 13" W.C. gas pressure from regulated LP systems and reduces the pressure to 10" W.C. to the manifold.

Manifold—a continually pressurized pipe distributing gas to top burner valves and oven thermostat.

Oven Thermostat— supplies gas to the oven pilot, and main burner; regulates oven temperature.

Pilot Assembly— consists of a thermocouple and a pilot hood where gas passing through the orifice is directed toward the oven burner pilot holes. The user holds the magnet in initially by pushing the knob in at the "pilot/push/hold" rotation and manually lighting the pilot. After approximately 5 seconds, the thermocouple input will hold the magnet in the open position and the user can release the knob and adjust to the desired temperature.

T

Oven Thermostat - senses oven temperature by means of a thermal bulb located in the upper rear of the oven. The oven control knob is set to the desired temperature calling for heat; the fluid expands in the bulb as the temperature rises, moving the seat in the thermostat from full open to partial open as the desired temperature is reached, thus maintaining the set temperature. The gas is passed from the thermostat to the orifice block in the main burner, entering the burner and igniting from the pilot.

Oven Burner—The oven burner remains on once the thermostat is turned on. The **size** of the flame changes to a high or low flame by the thermostat as regulated by the user setting the knob and the thermostat bulb sensing a satisfied oven temperature.

L

Note: The pilot gas line will remain open as long as the pilot is lighted and the thermocouple senses flame. If the pilot goes out, the magnet will drop out and shut off gas flow to the pilot.

Cooking Appliance TROUBLE SHOOTING GUIDE

Effective: 12/15/06

Guides are only intended for use on Atwood[®] products by service technicians who have successfully completed Atwood[®] training. This guide should be used in conjunction with the appropriate Instruction Manual provided with the product and any applicable Industry Standards. This is not intended to be a complete list. Please direct questions concerning service of Atwood[®] products to 866-869-3118 before proceeding.

CAUSE	SOLUTION
RANGE PILOT WON'T LIGHT OR	
Insufficient gas pressure	1. Check for gas leaks and have regulator checked by qualified LP gas technician
	2. Check gas supply
Quark such a shared	Set pressure to 11" W.C. with two or more gas appliances running
Supply valve closed	
blocked flash tubes	Clean pilot orifice with toothpick; clean flash tubes
BURNER(S) WON'T LIGHT OR ST	AY LIT
Insufficient gas pressure	Check for gas leaks, have regulator checked by qualified LP gas technician
Incorrect air/gas mixture	
Blocked orifice	Clean with toothpick
BURNER LIGHTS, BUT FLAME IS	TOO SMALL
Improper gas pressure	Check for gas leaks, have regulator checked by qualified LP gas technician
Improper air/gas mixture	
Problem burner valve	Replace burner valve
Blocked orifice	Clean with toothpick
BURNER FLAME LIFTS OFF BURI	NER HEAD
	Have regulator check by a qualified LP gas technician
OVEN BURNER LIGHTS, BUT FLA	AME REMAINS VERY SMALL AND OVEN HEATS VERY SLOWLY —
Improper das pressure	Check for gas leaks, have regulator checked by qualified LP gas technician
	Clean with alcohol and cotton swab
OVEN BURNER FLAME LIFTS OFF	F BURNER AND OVEN CYCLES TOO FREQUENTLY
Gas pressure too high	Have regulator checked by qualified LP gas technician, or improper gas mixture
OVEN COOKS UNEVENLY AND/OB	R FOOD BURNS ON THE BOTTOM
-	Oven too full for proper circulation - must have 1" clearance in all directions. Ventilation holes in oven bottom (shelf above burner) are covered. Check the
Droblem thermostst	top vent (on back of range) it must be clear of all insulation, etc.
Problem thermostat	Replace thermostat. Oven must be preheated at least 10 minutes.
merino buib out of position	

COOKING APPLIANCE - (continued) Effective: 12/15/06

OVEN PILOT OUTAGE 🚃

Safety Thermal Bulb out of position	-Re-position the safety thermal bulb.
Problem thermostat	-Replace thermostat
Blocked oven vent	-Remove obstruction from vent
Incorrect oven burner gas/air mixture	Readjust air

YELLOW FLAME TIPS

Improper gas-air mixture	Adjust air shutter if applicable
Low gas pressure	Check gas supply
•	Check for leaks and have the regulator checked
	Set pressure to 11" water column
RA Ranges and Cooktops	

Improper orifice to burner alignment ------------Realign burner head and orifice tube assembly Replace orifice

Operation and Trouble Shooting Guide - 33 Series α

TO LIGHT THE PILOT

Turn the oven knob to the pilot position and push in. Hold in for at least 5 seconds until pilot is well established.

PILOT WILL NOT COME ON

Check to see if the gas is turned on. Is there gas in the tanks? Check for blockage of the orifice, pilot assembly, or pilot line. Check for kinks in the pilot line.

PILOT WILL NOT STAY ON

Hold oven knob, pilot position, for up to 30 seconds. Check gas supply. Confirm that thermocouple is fully inserted into the thermocouple holder. Pilot flame out of position. Pilot flame is not engulfing thermocouple. Pilot assembly needs to be adjusted so that pilot flame is engulfing thermocouple. Test thermocouple.

Thermostat knob is bottoming out on manifold cover (face plate). If knob can not fully engage, the magnet in the thermostat will not be established. Move manifold out further beyond face plate.

THERMOSTAT CALIBRATION

The ideal temperature variance is 25 degrees (plus or minus). This means that if the thermostat is set at 350 degrees, the temperature will range between 325 and 375. If the temperature exceeds 50 degrees, plus or minus, check for a kinked capillary tube.

Drop-In Covers

Lift-Up Drop-in Cover

Add valuable counter space with the addition of the attractive Wedgewood Vision Drop-In Cover. When in the down position, it completely covers the Drop-In and provides a stable surface as it rests on the countertop itself. When in the up position with the windguards extended (as in the photograph at right), it provides a shield against splatters to the sides and back. Available for two- and three-burner units in black, white or stainless steel. The cover comes completely assembled with mounting screws. COPY ORDER FORM AND MAIL IN WITH PAYMENT

COOKING APPLIANCE LIMITED WARRANTY

Atwood Mobile Products warrants to the original owner and subject to the below mentioned conditions, that this product will be free of defects in material or workmanship for a period of two years from the original date of purchase. Atwood's liability hereunder is limited to the replacement of the product, repair of the product, or replacement of the product with a reconditioned product at the discretion of Atwood Mobile Products. This warranty is void if the product has been damaged by accident, unreasonable use, neglect, tampering or other causes not arising from defects in material workmanship. This warranty extends to the original owner of the product only and is subject to the following conditions:

- For two years from the date of the original purchase Atwood warrants that this product will be free of defects in material and workmanship with the exceptions noted below. This warranty includes reasonable labor charges required to remove and replace the part. Service calls to the customer's location are not considered part of these charges and are therefore the responsibility of the owner.
- This warranty does not cover the following items classified as normal maintenance and/or customer damage.
 - Damage, discoloration or scratches to porcelain enamel or other finishes from improper use and care.
 - b. adjustment of gas pressure
 - c. cleaning or adjustment of any burners
 - d. cleaning or replacement of burner offices
 - e. cleaning or adjustment of plict and thermocouple
 - 1. damage to glass
 - g. products purchased for commercial or industrial use.
- In the event of warranty claim the owner must contact in advance either an authorized Atwood Service Station or the Atwood Service Department. Warranty claim service must be performed at an authorized Atwood Service Station (a list will be provided at no charge) or as approved by the Atwood Service Department Atwood Mobile Products, 1120 North Main St., Eikhart, IN: 46514 USA. Phone 866-969-3116.

- Return parts must be shipped to Atwood Mobile Products "prepaid". Credit for shipping costs will be included with the warranty claim. The defective parts become the property of Atwood Mobile Products and must be returned to the Consumer Service Department, Atwood Mobile Products, Greenbrier Operations, 6320 Kelly Willis Road, Greenbrier, TN 37073 USA.
- This warranty applies only if the unit is installed according to the installation instructions provided and complies with local and state codes.
- The warranty on replacement parts is the unused portion of the original warranty period.
- Damage or failure resulting from misuse (including failure to seek proper repair service) misapplication, atterations, water damage or freezing are owner's responsibility.
- 8. Atwood does not assume responsibility for any loss of use of vehicle, loss of time, inconvenience, expense for gasoline, telephone, travel, lodging, loss or damage to personal property or revenues. Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.
- Any implied warranties are limited to two (2) years. Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific legal rights and you may also have other rights, which may vary, from State to State.
- Replacement parts purchased outside the original cooking warranty carry a 90 day warranty. This includes the part at no charge and reasonable labor charges to replace it.

This Atwood product is designed for use in recreation vehicles for the purpose as stated in the 'data plate'. Any other use, unless authorized in writing by the Atwood Engineering Department, volds the warranty. Atwood/Wedgewood Vision Products Include range/oven, drop-in, slide-in and high pressure stoves.

PLEASE USE ORDER FORM BELOW TO BEGIN EXTENDED SERVICE CONTRACT OF YOUR PRODUCT(S).

ΑT	WO	O D	ЕΧ	TEN	DED	SER	VICE	CONT	RACTS	

Water Heater Tank-An extended service contract is available covering the parts and labor for replacement of the inner tank in the event the water heater tank develops leaks due to \$45 corrosion. This extends the original (2) two year warranty an additional (3) three years for a total of (5) five years to the original owner from the original date of purchase of the water heater or vehicle.

Furnace Combustion Chamber-An extended service contract is available covering the parts and labor for the replacement of the combustion chamber in the furnace in the event the combustion chamber were to prematurely fail due to defects in material or workmanship. This extends the original (2) two year warranty an additional (3) three years for a total of (5) five years to the original owner from the date of purchase of the furnace or vehicle.

Range Gas Valves and Manifold-An extended service contract is available covering the parts and labor for the replacement of range burner valves and manifold in the event of \$15 premature failure due to defects in material and workmanship. This extends the original (2) two year warranty an additional (3) three years for a total of (5) five years to the original owner from the original date of purchase of the range or vehicle. ATWOOD RETURN GOODS PROGRAM

WARRANTY RETURNS – The Warranty Program, Must Return Parts List and approved Flat Rate Schedule provide the framework for Warranty Returns.

NON-DEFECTIVE RETURNS – A restocking fee of 20% will be charged for handling overstock returns or standard stock items ordered incorrectly by the customer. The product must be received in resalable condition. Product that has been specifically designed at the customer's request is non-returnable. Obsolete or outdated product will not be accepted for credit.

DEFECTIVE RETURNS – Within 30 days of sale, detective returns are to be shipped back to the respective manufacturing facility for Problem Cause Analysis (PCA), unless otherwise advised.

ALL WARRANTY RETURNS – If the PCA determines Atwood is responsible, full credit or replacement parts will be issued. If the PCA determines the customer is responsible, partial or no credit will be issued at Atwood's discretion.

SHIPPING DAMAGE - Once the product has been accepted at your facility, it is the customer's responsibility to file damage claim with the carrier.

RETURN PARTS – Before returning any part to Atwood, a Returned Goods Number (RGN) must be obtained by calling Atwood Mobile Products Service Department at 866-869-3118. Provide date of purchase, model and serial number for appliances, and make, model and tast 8 digits of VIN for hardware, windows and doors. If claims are not submitted within 6 months from the date of repair, claims will not be considers.

SHIPPING – If the PCA determines Atwood is responsible for the disposition of a defective and/or warranted part, reasonable shipping charges are reimbursed. All products not shipped via Atwood trucks should be shipped prepaid via UPS Ground when able (unless negotiated at the time the RGN is given). No collect shipments will be accepted.

PACKAGING – The RGN must be identified on each container and all packing information. Product returned must be packaged to prevent shipping damage. Full credit will not be issued on product sent back in an open skid or improperly packaged. Additional product boxes are available upon request when applicable. Warranty Claims must be submitted to the correct division.

MUST RETURN PARTS LIST – Atwood requires the defective part to be returned with the warranty claims form. Failure to accompany your claim with the part will result in the non-shipment of a replacement part, or the non-processing of the appropriate credit until the part is received by Atwood.

Before returning the part, an RGN (Return Goods Number) must be obtained by calling the Atwood Service Department at 866-869-3118. This RGN is required for all products. Without this RGN appearing on the outside of the shipping carton, the shipment will be refused by our Receiving Department.

RETURN CREDIT -- Credit will be issued 30 days after product is returned or RGN is dispositioned.

INFORMATION NOTICE

RECREATION VEHICLE LP PRESSURE DROP LEAK TEST

2/13/03

1. Attach pressure gage downstream of an appliance regulator. Pressurize entire recreation vehicle LP piping system to between 10" (250 MM) and 14" (350 MM) water column and then turn off pressure source.

FIGURE 1 shows a pressure gage fitted over an opened center burner valve of the recreation vehicles range.

Note: The system pressure of 13" water column reaches the gage under a no-flow condition. Under flow conditions the pressure should read 10" water column.)

FIGURE 1

2. Reduce system pressure to 8" (200 мм) water column (see FIGURE 2) so that the appliance regulator is in an open condition by opening an adjacent valve. Skipping this step will invalidate the results.

During a 3-minute period a pressure drop shall not occur.

Note: This test is ONLY valid when performed using the entire recreation vehicle LP piping system.

> The piping system of the RV must be the same temperature as the ambient air or there will be changes in pressure due to expansion and/or contraction.

FIGURE 2

INTERNET: http://www.atwoodmobile.com

3. Disconnect front of left burner tube by pulling wire clip away from

burner tube and slide burner tube off of burner valve orifice.

4. Retain rear spring clip, front wire clip, and black plastic bushing

6, DO NOT DISCARD OLD BURNER TUBES, they must be returned

5. Repeat steps 2 - 4 to remove right and center burner tubes.

on burner valve orifice all in original positions.

to Atwood. Follow the procedure in your letter.

LITERATURE NUMBER MPD 50108 **INFORMATION NOTICE** REPLACEMENT OF BURNER TUBES

ATWOOD SEALED BURNER COOKING APPLIANCES

11/21/07

- 3. Burner tube gaskets must be in place (c).
 - 4. Rotate the top downward to insure all three-burner tubes fit up into the burner caps (c). Using a side-to-side motion when rotating the top down may make this easier.
 - 5. Once the tubes are up into the burner cap, push backwards on the top until the bracket(s) on the front of the top fits into the control panel.
 - 6. Check each burner for proper lighting to ensure that the burner tube has been inserted into the burner head.

ENGLISH

FOR YOUR SAFETY READ ALL INSTRUCTIONS BEFORE INSTALLATION

RANGE/OVEN DOOR REMOVAL AND REPLACEMENT INSTRUCTIONS

1. Open oven door so that the hinges on each side of the door are visible. Place a metal pin (nail, cotter pin etc) in the hole (FIG A) of the hinges on each side of the door. This will stop the hinges on each side of the door from closing completely.

Literature Number MPD 57562

RANGE/OVEN DOOR REMOVAL AND REPLACEMENT INSTRUCTIONS

Effective 11/19/08

2. Close the door so that the metal pin stops the hinges on each side of the door from folding up completely.

3. Lift the door up and off the hinges on each side of the door and away from the range.

4. To replace the door on the hinges on each side of the door, line up the hinge slots in the door panel with the hinges and allow the door to slide onto the hinges.

5. Open the door so as to relieve the pressure of the closed hinges from the metal pins and remove the pins from the hinges.

6. Allow the door to close

INFORMATION NOTICE BI-FOLD COVER

All appliance tops manufactured since March 2006 will have slots on the back to accept the new hinge/arm.

Refer to MPD 53129 for complete Bi-Fold Cover instructions.

C

For complete Wedgewood range & cooktop instructions consult MPD 56280.

INSTALLATION PROCEDURE-

- Note: Before installing new regulator apply a small amount of pipe sealant suitable for use in a LP gas system to pipe threads of fitting on manifold and pipe threads of fitting that will be reinstalled to inlet of regulator.
- Note: Be sure to install regulator with arrow on body of regulator in the direction of gas flow (pointing towards manifold).
- Install new regulator following instructions in reverse order.
- After installation is complete turn on gas supply.

A WARNING EXPLOSION OR FIRE

- Do not use matches, candles or other sources of ignition to test fittings and gas lines for leaks.
 - Check all connections for gas leaks using a non-corrosive leak detection fluid. Do not use a scap and water solution. Leak test in excess of 8 oz. per square inch (1/2 psi) of air pressure will invalidate warranty.
